

Kiran Sonawane

Software Engineer II | QA Automation & AI Integration

kiranssonawane2010@gmail.com | Plano, TX | linkedin.com/in/kiranssonawane

EXECUTIVE SUMMARY

Results-driven Software Engineer II with 8+ years architecting and delivering enterprise-grade QA automation solutions for Fortune 500 financial services. Expert in AI-assisted test automation (GitHub Copilot, Agentic AI, MCP Servers), accessibility testing (ADA compliance), and leveraging cutting-edge tools to reduce manual testing effort by 40%+. Proven ability to accelerate automation maturity through intelligent scripting, visual regression testing, and comprehensive cross-platform validation. Deep expertise in Appium mobile testing, API validation, CI/CD integration, and strategic business-technology alignment to drive digital transformation initiatives.

CORE COMPETENCIES

AI & Automation Intelligence: GitHub Copilot, Agentic AI, Codeium, MCP Servers (Playwright, Splunk, Dynatrace, JIRA integration)

Mobile Testing: Appium (iOS/Android), XCUITest, Espresso, TestFlight, Google Play, native/hybrid app testing

Automation Frameworks: Cucumber+, Selenium WebDriver, AppliTools visual regression, WireMock service virtualization, Sauce Labs

Accessibility Testing: ADA compliance, WCAG standards, dynamic fonts, dark mode, landscape orientation, accessibility automation

API & Backend Testing: Postman, Bruno, SOAP UI, SQL validation, backend service testing, WireMock mocking

CI/CD & Monitoring: Jenkins, Bitbucket, Splunk log analysis, Dynatrace APM, Bugsnag monitoring, performance metrics analysis

Testing Expertise: Functional, regression, cross-browser, cross-platform, baseline, visual regression, production validation

Business & Process: Requirements gathering, BRD/FSD/TSD analysis, stakeholder management, process mapping, Agile/Scrum

Development Tools: IntelliJ, Android Studio, Xcode, Visual Studio, Maven, ServiceNow, JIRA, SQL

PROFESSIONAL EXPERIENCE

Software Engineer II, QA Automation

Oct 2024 – Present

A Fortune 500 Financial Services Company | Plano, TX

Leading AI-assisted QA automation for enterprise payment platforms (Transfer, ACH Payments, Direct Deposit, Zelle, Bill Pay, Invoicing).

- Accelerated automation maturity using AI-assisted tools: GitHub Copilot for intelligent test script generation, Agentic AI for autonomous test optimization, and MCP Servers (Playwright, Splunk, Dynatrace, JIRA) for unified workflow integration; reduced manual testing effort by 40%
- Architected comprehensive accessibility testing program ensuring ADA compliance across payment platforms; tested dynamic fonts, dark mode, liquid glass, and landscape orientation scenarios; validated 95%+ pass rates with zero accessibility violations

- Implemented advanced visual regression testing using AppliTools; created wireframe and scenario-based automation reducing visual defects by 60% and improving UI consistency detection across iOS, Android, and web platforms
- Established multi-platform testing strategy with Appium for iOS/Android, Selenium for web, and Sauce Labs for cross-device validation; achieved 95%+ pass rates across 500+ automated test cases
- Integrated service virtualization with WireMock reducing external API dependencies by 70%; enabled parallel test execution and eliminated 30+ production environment test bottlenecks
- Collaborated with DSP/UI development teams using Splunk and Dynatrace for targeted diagnostics; leveraged TraceID for accelerated issue resolution, reducing average debugging time by 35%
- Partnered with business teams and product owners to translate complex financial workflows into comprehensive test strategies; gathered detailed requirements and validated quality across payment feature implementations
- Drove Agile initiatives through active sprint participation, backlog refinement, and retrospectives; identified process improvements and implemented UDF expansions resulting in 25% faster test cycle times

QA Engineer

Jun 2021 – Oct 2024

CBC Companies | Columbus, OH

- Implemented intelligent automation using MABL achieving 30% reduction in manual testing; created comprehensive automation suites, test plans, and traceability matrices supporting complex web releases
- Performed comprehensive API testing using Postman and backend validation using SQL; managed release coordination through RunDeck, ServiceNow, and IREL ticketing systems
- Collaborated with SMEs, developers, business stakeholders in Agile environment; gathered requirements and developed test strategies aligned with business objectives
- Created comprehensive test documentation including regression test cases, functional test plans, and business requirements traceability matrices supporting enterprise releases

QA Engineer (Freelancer)

Oct 2019 – Jun 2021

Upwork | Columbus, OH

- Tested web and mobile applications for international clients; performed cross-browser functional, regression, and usability testing
- Validated beta builds using TestFlight and Google Play; created test cases, reported defects in JIRA, and validated fixes across multiple platforms

Software QA Engineer

Apr 2019 – Sep 2019

IntelliX Software | Columbus, OH

- Created manual and automated test cases using HP UFT and ALM; performed web services testing using SOAP UI and SQL validation
- Developed regression suites and supported UAT activities; collaborated with development teams to deliver quality releases

EDUCATION

Master of Personnel Management (MPM)

Bachelor of Computer Applications (BCA)
